Activity 9 · Conversions and Attribution Limits · Prompts

TGS-2022017520 · v14.0 · Synthetic training data

Prompt1

Compare first-touch and last-touch attribution for four synthetic journeys. Reconcile each model to $2400. Explain why this does not implement GA4 data-driven attribution or estimate incremental lift. Propose a safer budget decision.

Prompt2

Challenge the previous result. Find denominator errors,unsupported claims,bias,privacy risks and unexecuted tool boundaries. Cite exact row IDs or fields. Revise the report without inventing data.

Scope

Read only this activity’s working copy;write outputs only. No external sends,live account changes or publication.
