Activity 11 · SEO Content Experiment · Prompts

TGS-2022017520 · v14.0 · Synthetic training data

Prompt1

Analyse the synthetic search export, calculate CTR and enquiry-per-click, cluster intent, and propose one controlled content experiment. Use approved claims only. State confounders and avoid promising rankings or AI visibility.

Prompt2

Challenge the previous result. Find denominator errors,unsupported claims,bias,privacy risks and unexecuted tool boundaries. Cite exact row IDs or fields. Revise the report without inventing data.

Scope

Read only this activity’s working copy;write outputs only. No external sends,live account changes or publication.
